

RPS17L Antibody (Center)

Catalog_no :	AB0632
Applications :	IF, WB
Reactivity :	H
Category :	抗原抗体
Size :	100 μ L/50 μ L
Immunogen :	HUMAN:77-103
Specificity :	This RPS17L antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 77-103 amino acids from the Central region of human RPS17L.
Source :	Rabbit
Dilution :	WB,1:1000;
Purification :	Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.
Other_name :	40S ribosomal protein S17-like, RPS17L
Isotype :	Rabbit Ig
Background :	Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 40S subunit. The protein belongs to the S17E family of ribosomal proteins. It is located in the cytoplasm. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudogenes of this gene dispersed through the genome.
