

GTF2E1 Antibody (N-term)

Catalog_no :	AB1351
Applications :	WB, IHC-P
Reactivity :	H
Category :	抗原抗体
Size :	100μL/50μL
Immunogen :	HUMAN:93-121
Specificity :	This GTF2E1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 93-121 amino acids from the N-terminal region of human GTF2E1.
Dilution :	WB,1:1000;IHC-P,1:10~50;
Purification :	Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.
Other_name :	General transcription factor IIIE subunit 1, General transcription factor IIIE 56 kDa subunit, Transcription initiation factor IIIE subunit alpha, TFIIE-alpha, GTF2E1, TF2E1
Isotype :	Rabbit Ig
Background :	Recruits TFIIH to the initiation complex and stimulates the RNA polymerase II C-terminal domain kinase and DNA-dependent ATPase activities of TFIIH. Both TFIIH and TFIIE are required for promoter clearance by RNA polymerase.
