

## TH1L Antibody (C-term)

Catalog\_no : AB1604

Applications : WB

Reactivity : H

Category : 抗原抗体

Size : 100μL/50μL

Immunogen : HUMAN:548-576

Specificity : This TH1L antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 548-576 amino acids from the C-terminal region of human TH1L.

Dilution : WB,1:1000;

Purification : Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Other\_name : Negative elongation factor C/D, NELF-C/D, TH1-like protein, NELFCD, NELFD, TH1, TH1L

Isotype : Rabbit Ig

Background : The NELF complex of proteins interacts with the DSIF protein complex to repress transcriptional elongation by RNA polymerase II. The protein encoded by this gene is an essential part of the NELF complex. Alternative translation initiation site usage results in the formation of two isoforms with different N-termini.
