

## WIF1 Antibody(Human C-term)

Catalog_no :	AB2101
Reactivity :	H, M
Category :	抗原抗体
Size :	100 $\mu$ L/50 $\mu$ L
Immunogen :	HUMAN:347-376
Specificity :	This WIF1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 347-376 amino acids from the C-terminal region of human WIF1.
Dilution :	,1:500;WB,1:2000;WB,1:1000;
Purification :	Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.
Other_name :	Wnt inhibitory factor 1, WIF-1, WIF1
Isotype :	Rabbit Ig
Background :	WNT proteins are extracellular signaling molecules involved in the control of embryonic development. WIF1 is a secreted protein, which binds WNT proteins and inhibits their activities. This protein contains a WNT inhibitory factor (WIF) domain and 5 epidermal growth factor (EGF)-like domains. It may be involved in mesoderm segmentation. This protein is found to be present in fish, amphibia and mammals.
