

WNT10B Antibody (Center)

Catalog_no :	AB2407
Reactivity :	H, Rat
Category :	抗原抗体
Size :	100 μ L/50 μ L
Immunogen :	HUMAN:193-222
Specificity :	This WNT10B antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 193-222 amino acids from the Central region of human WNT10B.
Dilution :	WB,1:2000;IHC-P,1:10~50;FC,1:10~50;
Purification :	Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.
Other_name :	Protein Wnt-10b, Protein Wnt-12, WNT10B, WNT12
Isotype :	Rabbit Ig
Background :	The WNT gene family consists of structurally related genes which encode secreted signaling proteins. These proteins have been implicated in oncogenesis and in several developmental processes, including regulation of cell fate and patterning during embryogenesis. WNT10B is a member of the WNT family. It may be involved in breast cancer, and its protein signaling is likely a molecular switch that governs adipogenesis. This protein is 96% identical to the mouse Wnt10b protein at the amino acid level.
