

AP2A2 Antibody (Center)

Catalog_no :	AB2598
Reactivity :	H
Category :	抗原抗体
Size :	100μL/50μL
Immunogen :	HUMAN:610-637
Specificity :	This AP2A2 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 610-637 amino acids from the Central region of human AP2A2.
Dilution :	WB,1:1000;IHC-P,1:10~50;FC,1:10~50;
Purification :	Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.
Other_name :	AP-2 complex subunit alpha-2, 100 kDa coated vesicle protein C, Adaptor protein complex AP-2 subunit alpha-2, Adaptor-related protein complex 2 subunit alpha-2, Alpha-adaptin C, Alpha2-adaptin, Clathrin assembly protein complex 2 alpha-C large chain, Huntingtin yeast partner J, Huntingtin-interacting protein 9, HIP-9, Huntingtin-interacting protein J, Plasma membrane adaptor HA2/AP2 adaptin alpha C subunit, AP2A2, ADTAB, CLAPA2, HIP9, HYPJ, KIAA0899
Isotype :	Rabbit Ig
Background :	Adaptins are components of the adaptor complexes which link clathrin to receptors in coated vesicles. Clathrin-associated protein complexes are believed to interact with the cytoplasmic tails of membrane proteins, leading to their selection and concentration. Alpha adaptin is a subunit of the plasma membrane adaptor. It binds polyphosphoinositides.
