

CSR2BP Antibody (Center)

Catalog_no :	AB2631
Reactivity :	H, M
Category :	抗原抗体
Size :	100 μ L/50 μ L
Immunogen :	HUMAN:246-275
Specificity :	This CSR2BP antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 246-275 amino acids from the Central region of human CSR2BP.
Dilution :	WB,1:1000;IHC-P,1:50~100;
Purification :	Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.
Other_name :	Cysteine-rich protein 2-binding protein, CSR2-binding protein, ADA2A-containing complex subunit 2, ATAC2, CRP2-binding partner, CRP2BP, CSR2BP
Isotype :	Rabbit Ig
Background :	CSR2 is a protein containing two LIM domains, which are double zinc finger motifs found in proteins of diverse function. CSR2 and some related proteins are thought to act as protein adapters, bridging two or more proteins to form a larger protein complex. The protein encoded by this gene binds to one of the LIM domains of CSR2 and contains an acetyltransferase domain. Although the encoded protein has been detected in the cytoplasm, it is predominantly a nuclear protein. Two transcript variants encoding different isoforms have been found for this gene.
