

(Mouse) Sox17 Antibody (C-term)

Catalog_no :	AB3026
Reactivity :	H, M
Category :	抗原抗体
Size :	100μL/50μL
Immunogen :	HUMAN
Specificity :	This (Mouse) Sox17 antibody is generated from a rabbit immunized with a KLH conjugated synthetic peptide between 376-409 amino acids from the C-terminal region of human (Mouse) Sox17.
Dilution :	WB,1:1000;
Other_name :	Transcription factor SOX-17, Sox17, Sox-17
Isotype :	Rabbit Ig
Background :	Acts as transcription regulator that binds target promoter DNA and bends the DNA. Binds to the sequences 5'- AACAAT-3' or 5'-AACAAAG-3'. Modulates transcriptional regulation via WNT3A. Inhibits Wnt signaling. Promotes degradation of activated CTNNB1. Plays a key role in the regulation of embryonic development. Required for normal looping of the embryonic heart tube. Required for normal development of the definitive gut endoderm. Probable transcriptional activator in the premeiotic germ cells. Isoform 2 (T-SOX17) shows no DNA-binding activity.
