

RLBP1 Antibody (C-term)

Catalog_no : AB3454

Reactivity : M

Category : 抗原抗体

Size : 100μL/50μL

Immunogen : HUMAN

Specificity : This RLBP1 antibody is generated from a rabbit immunized with a KLH conjugated synthetic peptide between 255-288 amino acids from the C-terminal region of human RLBP1.

Dilution : WB,1:2000;

Other_name : Retinaldehyde-binding protein 1, Cellular retinaldehyde-binding protein, RLBP1, CRALBP

Isotype : Rabbit Ig

Background : Soluble retinoid carrier essential the proper function of both rod and cone photoreceptors. Participates in the regeneration of active 11-cis-retinol and 11-cis-retinaldehyde, from the inactive 11-trans products of the rhodopsin photocycle and in the de novo synthesis of these retinoids from 11-trans metabolic precursors. The cycling of retinoids between photoreceptor and adjacent pigment epithelium cells is known as the 'visual cycle'.
