

LPP Antibody (N-Term)

Catalog_no :	AB3522
Reactivity :	H, M
Category :	抗原抗体
Size :	100 μ L/50 μ L
Immunogen :	HUMAN
Specificity :	This LPP antibody is generated from a rabbit immunized with a KLH conjugated synthetic peptide between 32-66 amino acids from the human LPP.
Dilution :	WB,1:2000;
Other_name :	Lipoma-preferred partner, LIM domain-containing preferred translocation partner in lipoma, LPP
Isotype :	Rabbit Ig
Background :	May play a structural role at sites of cell adhesion in maintaining cell shape and motility. In addition to these structural functions, it may also be implicated in signaling events and activation of gene transcription. May be involved in signal transduction from cell adhesion sites to the nucleus allowing successful integration of signals arising from soluble factors and cell-cell adhesion sites. Also suggested to serve as a scaffold protein upon which distinct protein complexes are assembled in the cytoplasm and in the nucleus.
