

SARS-CoV-2 (2019-nCoV) NSP9-his & AVI Recombinant Protein

Catalog_no :	AD-PD266014
Category :	冠状病毒产品
Size :	100 µg
Specificity :	SARS-CoV-2
Source :	E. coli
纯度 :	> 90 % as determined by SDS-PAGE.
缓冲液 :	The recombinant SARS-CoV-2 (2019-nCoV) NSP9 Protein consists of 140 amino acids and predicts a molecular mass of 15.46 kDa. Lyophilized from sterile 50mM Tris, 150mM NaCl, 2mM βME, pH 7.4Please contact us for any concerns or special requirements. Nor
运输及保存条件 :	In general, recombinant proteins are provided as lyophilized powder which are shipped at ambient temperature.Bulk packages of recombinant proteins are provided as frozen liquid. They are shipped out with blue ice unless customers require otherwise.
Molecular Weight :	The recombinant SARS-CoV-2 (2019-nCoV) NSP9 Protein consists of 140 amino acids and predicts a molecular mass of 15.46 kDa.
内毒素 :	Please contact us for more information.
生物活性 :	Testing in progress
