

## V5-Tag Monoclonal Antibody(3C8), AbFluor ™ 680 Conjugated

Applications :WB,IP,IF/ICCReactivity :Species independentCategory :抗原抗体Size :100ulSpecificity :V5-Tag Monoclonal Antibody(3C8) AbFluor ™ 680 Conjugated specially designed for your Immunofluorescence analysis.Formulation :Liquid in PBS, pH 7.4, containing 0.02% sodium azide as preservative and 50% Glycerol.Source :Mouse IgGDilution :Optimal working dilutions should be determined experimentally by the investigator. Suggested starting dilutions are as follows: IF: 1:1000.Purification :Img/mlStorage_stabilityStable for one year at -20°C from date of shipment. For maximum recovery of product, centrifuge the original vial after thawing and prior to removing the cap. Aliquot to avoid repeated freezing and thawing. Store in dark.Other_name :V5	Catalog_no :	AM2157
Category:       抗原抗体         Size:       100ul         Specificity:       V5-Tag Monoclonal Antibody(3C8) AbFluor ™ 680 Conjugated specially designed for your Immunofluorescence analysis.         Formulation:       Liquid in PBS, pH 7.4, containing 0.02% sodium azide as preservative and 50% Glycerol.         Source:       Mouse IgG         Dilution:       Optimal working dilutions should be determined experimentally by the investigator. Suggested starting dilutions are as follows: IF: 1:1000.         Purification:       The antibody was affinity-purified from mouse ascites by affinity-chromatography using specific immunogen.         Concentration:       1mg/ml         Storage_stability       Stable for one year at -20°C from date of shipment. For maximum recovery of product, centrifuge the original vial after thawing and prior to removing the cap. Aliquot to avoid repeated freezing and thawing. Store in dark.	Applications :	WB,IP,IF/ICC
