

## Eupatilin

Catalog_no :	ADMC0020
Category :	抑制剂与激动剂
Size :	10mg/50mg/100mg
Specificity :	Target: PPAR. Fields: Eupatilin is a pharmacologically active flavone derived from Artemisia plants, induces cell cycle arrest in ras-transformed human mammary epithelial cells.
Dilution :	
Purification :	>99%
Concentration :	靶点 : PPAR;IC50 : No data
Storage_stability :	4 Degree for 1 year, -20 degree for more than 2 years
Other_name :	NSC 122413
Molecular Weight :	344.31
Notes :	Eupatilin is a pharmacologically active flavone derived from Artemisia plants, induces cell cycle arrest in ras-transformed human mammary epithelial cells.
