

Ripasudil(K-115)

Catalog_no :	ADMC0659
Category :	抑制剂与激动剂
Size :	10mg/50mg/100mg
Specificity :	Target: ROCK. Fields: K-115, an isoquinolinesulfonamide compound, is a highly selective and potent (IC ₅₀ = 31 nM) Rho-kinase inhibitor; is in Phase II clinical development in patients with POAG or ocular hypertension.
Purification :	>98%
Concentration :	靶点 : ROCK;IC ₅₀ : No data
Storage_stability :	2 years -20°C Powder, 2 weeks 4°C in DMSO, 6 months -80°C in DMSO
Other_name :	K 115; K115
Molecular Weight :	395.88
Notes :	K-115, an isoquinolinesulfonamide compound, is a highly selective and potent (IC ₅₀ = 31 nM) Rho-kinase inhibitor; is in Phase II clinical development in patients with POAG or ocular hypertension.
