

## GSK923295

Catalog_no :	ADMC0675
Category :	抑制剂与激动剂
Size :	10mg/50mg/100mg
Specificity :	Target: Kinesin . Fields: GSK923295 is a first-in-class, specific allosteric inhibitor of CENP-E kinesin motor ATPase with $K_i$ of 3.2 nM, and less potent to mutant I182 and T183. Phase 1. $K_i$ : 3.2 nM (human CENP-E), 1.6 nM (canine CENP-E)[1]
Dilution :	$K_i$ : 3.2 nM (human CENP-E), 1.6 nM (canine CENP-E)[1]
Purification :	>98%
Concentration :	靶点 : Kinesin;IC50 : $K_i$ : 3.2 nM (human CENP-E), 1.6 nM (canine CENP-E)[1]
Storage_stability :	2 years -20°C Powder, 2 weeks 4°C in DMSO, 6 months -80°C in DMSO
Other_name :	GSK-923295
Molecular Weight :	592.13
Notes :	GSK923295 is a first-in-class, specific allosteric inhibitor of CENP-E kinesin motor ATPase with $K_i$ of 3.2 nM, and less potent to mutant I182 and T183. Phase 1. $K_i$ : 3.2 nM (human CENP-E), 1.6 nM (canine CENP-E)[1]
