| Ratswissprot_no :   | <a href="#">P15127</a>                                                                                                                      |
| Immunogen :         | The antiserum was produced against synthesized peptide derived from human IR around the phosphorylation site of Tyr1361. AA range:1331-1380 |
| Specificity :       | Phospho-Insulin R (Y1361) Polyclonal Antibody detects endogenous levels of Insulin R protein only when phosphorylated at Y1361.             |
| Formulation :       | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.                                                                     |
| Source :            | Rabbit                                                                                                                                      |
| Dilution :          | Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300. ELISA: 1/10000. Not yet tested in other applications.                    |
| Purification :      | The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.                       |
| Concentration :     | 1 mg/ml                                                                                                                                     |
| Storage_stability : | -20°C/1 year                                                                                                                                |
| Msds :              | <a href="#">MSDS_Antibody.pdf</a>                                                                                                           |

Other\_name : INSR; Insulin receptor; IR; CD antigen CD220

Molecular Weight : 95KD
