Immunogen: Synthesized peptide derived from human MPDZ

This antibody detects endogenous levels of MPDZ at Human/Mouse/Rat Specificity:

Formulation: Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Rabbit

Dilution: WB 1:500-2000

The antibody was affinity-purified from rabbit serum by affinity-chromatography using Purification:

specific immunogen.

Concentration: 1 mg/ml

Storage_stability -20°C/1 year

Background: The protein encoded by this gene has multiple PDZ domains, which are hallmarks of

protein-protein interactions. The encoded protein is known to interact with the HTR2C

receptor and may cause it to clump at the cell surface. Multiple transcript variants

encoding different isoforms have been found for this gene. [provided by RefSeq, Aug 2015],
