

Progesterone Receptor (phospho-Ser345) rabbit pAb

Catalog_no :	AP1452
Applications :	WB
Reactivity :	Human
Category :	抗原抗体
Size :	100µg/50µg/20µg
Gene_name :	PGR NR3C3
Protein_name :	Progesterone Receptor (Ser345)
Humangene_id	5241
:	
Humanswissprot	P06401
_no :	
Mouseswissprot	Q00175
_no :	
Ratgene_id :	25154
Ratswissprot_no	Q63449
:	
Immunogen :	Synthesized phosho peptide around human Progesterone Receptor (Ser345)
Specificity :	This antibody detects endogenous levels of Human Progesterone Receptor (phospho-Ser345)
Formulation :	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source :	Rabbit
Dilution :	WB 1:1000-2000
Purification :	The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen.
Concentration :	1 mg/ml
Storage_stability	-20°C/1 year
:	
Other_name :	Progesterone receptor (PR) (Nuclear receptor subfamily 3 group C member 3)
Molecular Weight :	105KD

Background : progesterone receptor(PGR) Homo sapiens This gene encodes a member of the steroid receptor superfamily. The encoded protein mediates the physiological effects of progesterone, which plays a central role in reproductive events associated with the establishment and maintenance of pregnancy. This gene uses two distinct promoters and translation start sites in the first exon to produce several transcript variants, both protein coding and non-protein coding. Two of the isoforms (A and B) are identical except for an additional 165 amino acids found in the N-terminus of isoform B and mediate their own response genes and physiologic effects with little overlap.
